

# CUSTOM SUNVISORS

## FOR COMMERCIAL VEHICLES

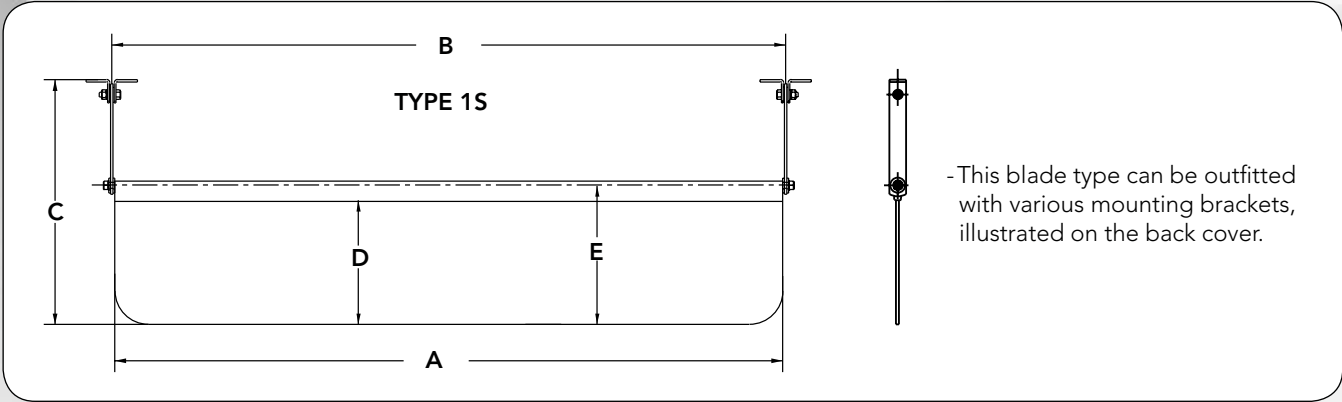

SUNVISORS

Rosco has been manufacturing heavy duty sunvisors for over fifty years. We are the recognized industry leader, supplying major OEM's including Navistar, Freightliner, AM General, Oshkosh, Utilimaster and other leading vehicle manufacturers. Our sunvisors are designed using the latest 3D CAD software. This ensures fast turnaround of a remarkably accurate, finished product. We use the finest heavy duty materials. Each visor goes through a multi-step process, which includes hand stitching (vinyl visors only) and 100% final inspection. This guarantees customer satisfaction. Rosco offers a large variety of padded, single and dual blade sunvisors. A typical assembly includes one or two blades attached to one of our knob and mounting sub-assemblies. We also offer individual components or custom combinations. If you have a custom size, contact our sales department for pricing and availability. Our standard line of acrylic sunvisors are suitable for use when a see through visor is needed. These visors are an economical alternative to our heavy duty, padded line.

THE STANDARD CLASS - CUSTOMIZED TO ANY DIMENSIONS

The Rosco Standard Class sunvisor is an economical alternative to the heavy duty class. It is designed for applications such as school & small cutaway bus, light truck, walk-in van and specialty vehicles. The acrylic blade is offered as transparent gray in light transmittance values of 0 (opaque) to 13% (standard) to 25% allowable light transmittance. A variety of mountings are available. (See Back of Brochure)

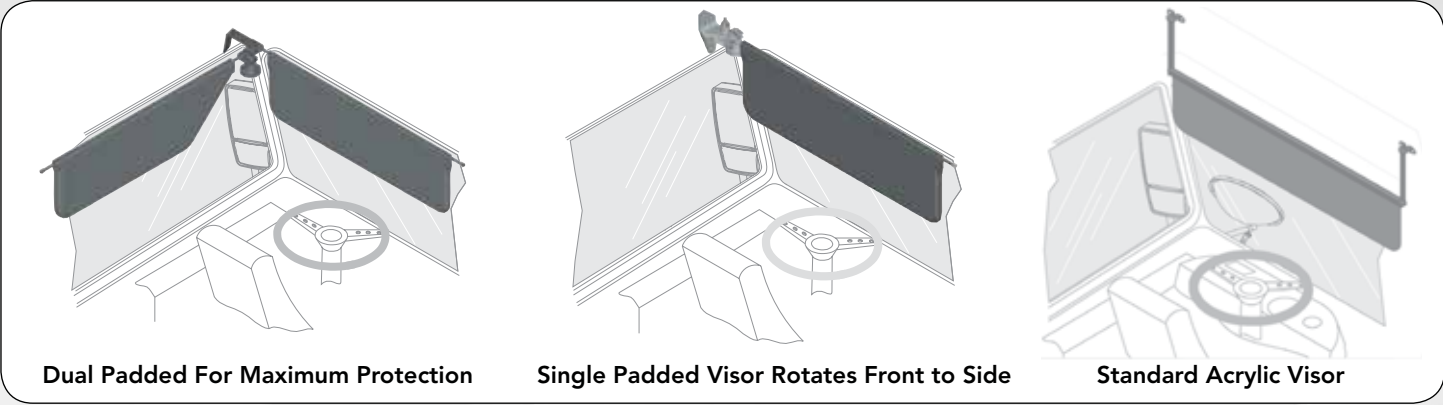

USING THIS CHART

- 1. Determine your sunvisor's size and configuration.
  - 2. Choose a blade type and mount sub-assembly on this blade.
  - 3. Use the table on this page to find the model that fits your requirements. All dimensions are in inches.
  - 4. If you don't find the size or configuration you need, call our sales department to discuss a custom model.
- NOTE: The reference line for blade height (dimension E) is the center line of the mounting rod/bolt and not the top edge of the blade.

OVERALL DIMENSIONS

P/N	TYPE	A	B	C	D	E	MOUNTING
833	1S	33.00	33.35	15.00	7.70	8.38	KM21

SWING SHADE - MULTI-POSITION ACRYLIC VISOR

THE HEAVY DUTY CLASS - CUSTOMIZED TO ANY DIMENSIONS

The Rosco heavy duty class of sunvisors is designed to stand up to the rigors and demands of today's bus and truck industry. It's superior craftsmanship and design is unsurpassed. Only the finest heavy duty materials are used. The vinyl padding resists scratching, tearing and fading. Special options such as hinged acrylic drop-downs, or clear sign pockets can be added to most visors in the heavy duty class. All are capable of dimension, mount, and arm customization.

## NEW YORK SINCE 1907

Rosco was established in 1907. For over a century, our goals have remained the same: We are committed to producing the highest quality automotive products and providing the level of service our customers have grown to expect.

Today, while Rosco mirrors are on all school buses manufactured in North America, we also supply our mirrors, visors, and digital vision products to nearly every commercial bus, truck, military, and specialty vehicle manufacturer as well. Our products are designed and largely built in the USA. Our staff has grown to over 250 people in facilities totaling over one hundred thousand square feet.

As we move forward we have set our goals even higher. We are now certified to ISO-9001:2008. Our focus on total quality management and continuous improvement will keep our product quality at levels our customers demand.

We will strive to improve our customer service through online and other electronic resources. We will continue to develop newer and better products to serve the ever-changing needs of the marketplace of tomorrow.
